

We love the city: Lively city

Elements with light

Escofet[®]

Transforming environments through the light integrated in the concrete urban furniture to generate distinctive and pleasant atmospheres at night, as well as to reveal new uses that change the collective perception of the nighttime public space.

Improving quality of life by extending the uses of urban spaces beyond daylight hours, attending the needs of the community, promoting economic development and revitalizing squares, parks, streets and avenues.

Promote safe and secure public spaces by providing light comfort throughout an environment, signaling entrances or emphasizing certain routes, making the most of the potential of lighting technology.

Encourage socialization by stimulating encounters through meeting points, improving the user experience in the different scenarios of the city and ensuring the health and well-being of people.
